

THE LEADER IN WORKFORCE WEARABLES

MakuSafe® is an award-winning wearable safety technology designed to monitor leading indicators of hazards and risk in real-time. It tracks factors such as heat exposure, strain/exertion, musculoskeletal risk (MSDs), noise levels, air quality, slips/trips/falls, and allows push-to-talk communication.

The MakuSmart® Cloud provides robust analytics, real-time notifications, and enables proactive safety management.

Reduce work comp claims by 50-90%, maintain worker privacy, no PII.

The MākuSafe® Ally™ gathers & transmits data in real-time to the MākuSmart® Cloud

Ergonomics

Slips, Trips and Falls
Repetitive Motions
Worker Physicality
Forceful Exertion

Battery

22 Hour Battery
Multiple Shifts

MyVoice™

Audio Messaging
Voice-to-text
Push-to-talk

Spatial Awareness

Location Identification
Worker-to-worker Proximity
Interact™ Smart Factory Integration
Scout™ Forklift/PIV Safety

Environment

Ambient Light
Air Quality (TVOC & CO2)
Noise / Sound Dosage
Air Pressure
Humidity
Temperature

Proven results.

The MākuSmart® Cloud provides leaders with actionable safety intelligence, real-time notifications, trends, and customizable reporting to reduce incident frequency and severity.

**With optional Interact™, the MākuSafe solution enables connected worker integrations in advanced manufacturing and industry 4.0 smart factories, for productivity gains and enhanced digital transformation efforts.
